

Feet / supporting foot Comfort

Height adjustment with a wire rope

moll's patented development facilitates, for the first time ever, the **synchronous - and almost instant! - mechanical adjustment** of the height of the desk and inclusive any Additions that have been linked to the table in a single movement of the hand.

- Easy and uncomplicated to operate - even when sitting
- Patented childproof catch
- Continuous height adjustment
- Feet and supporting feet linked with a transmission gear
- For desk heights from 53 cm to 82 cm
- Ergonomically designed for user heights from 109 - 200 cm

Important:

The Comfort supporting feet can only be combined with the Comfort feet.

While adjusting the height the maximum load is limited to 30 kg.

With the Comfort height adjustment, a simple pull is all that is required to adjust the desk height to the user's body height.

The key for the height adjustment can remain attached to the desk or can also be removed from it.

Height settings
see page 6

The main advantage: **Additions grow with the child**

Thanks to the lift technology, all elements „grow“ with the desk as the height is adjusted, and do not need to be adjusted separately.
